

Clean House LLC Cleaning Services Plan Of Action To Combat And Slow The Spread Of The Coronavirus

Covid-19 Update—Keeping a clean and disinfected home is one of the most important steps in keeping the spread of the coronavirus at a reduced rate. Our main goal at Clean House is to be that front-line cleaning force for you and help your home stay disinfected and free from this virus. ISSA and the CDC have provided protective measures to help us in fighting this infectious disease and we plan to follow their guidelines.

What Clean House LLC is doing:

Clean House LLC is observing and growing everyday to help prevent the spread of the corona virus with the help of the CDC and ISSA's updates and suggestions on how to combat this disease. The following is the protective measures we are implementing with our staff and equipment to ensure we are keeping your home EXTRA DISINFECTED and everyone safe from the corona virus:

All technicians on both outside services and our maid service will be wearing facemasks, gloves, and booties on their shoes. All technicians

will have hand sanitizer in their vehicles to use in between and at homes if needed.

We are providing disinfecting wipes to all of our maid service technicians to wipe down all equipment in between each home's cleaning. We will not enter your home until the equipment has been thoroughly wiped down. As always, each home gets their own mop head, we never reuse mop heads, once we leave a home they get put in a plastic bag and sealed to be washed and sanitized at our office. We provide clean and fresh sanitized towels to each home, we never reuse towels after we clean a home those dirty towels go in a sealed bag to be cleaned and sanitized at our office.

Creating a distributed workforce. We are now working more and more as single maids. This has a few benefits. First, it avoids having all of our staff at the office each morning and allows us to implement social distancing protocols. It also reduces the likelihood of social spread among team members in the rare instance that someone is exposed to the virus.

In addition to the above mentioned, we are training all our employees to stay home if they have a temperature, cough, or any other symptoms related to the corona virus or flu. We are also asking that our client's call to reschedule cleaning appointments if anyone in their home is sick or carrying symptoms of the above mentioned illnesses. We are taking every step possible to make sure our staff knows it is our duty to help slow the spread of the covid-19 disease and that they are extra mindful and aware of their own health.

Clean House LLC will continue to provide you with the best cleaning services while innovating our processes as we learn more about the corona virus and ways we can keep everyone safe and all surfaces clean and sanitized. We thank you for your continued business and we will get through this together.

Sincerely,

Cesar Barriga
